PAVEAU

GLASSWARE

Handcrafted glassware with a *message*

Paveau glassware is more than a stylish atmosphere maker in the room. We created our pieces to allow more sustainability to seep into our day-to-day lives. Out of love for people and the planet. You will truly adore our beautiful creations, because they are...

.

Colourful.

Colour brings joy and happiness to your life. And to your home. Our handcrafted pieces are available in several different colours to match every interior and mood.

Charming.

Our glassware is mouth blown, so every piece is unique with its own traits and slight imperfections. True charm can be found in the smallest details.

Conscious.

Choosing our creations instead of plastic is choosing for our precious planet. As part of our environmental commitment, we support clean water projects all over the world.

Our story

As a young mom, I think it's important to be aware of our planet. That is why we opted for a tap with filtered water when renovating our home. Goodbye plastic waste mountain!

But it needs to be pleasing to the eye. The conscious choices I make always go hand in hand with a good dash of aesthetics. As an interior enthusiast I like to pay attention to details that give my surroundings a stylish upgrade.

And glass is one of my favorites, because it is a versatile and elegant atmosphere maker. When my grandmother gave us 100-year-old vintage Val Saint Lambert glasses in different colors for our wedding, it was love at first sight.

When we invite friends, I combine this special glassware with my modern tableware. It gives the dining table a unique and cosy touch.

Sustainable design

To complete that stylish atmosphere at the table, I went looking for beautiful and easy to refill glass pieces with a twist. But the options proved limited. The idea grew gradually to launch a brand, based on sustainability and inspiring design.

Suddenly all the glass pieces fell into place, fused into a new concept: **Paveau Glassware.**

With a lot of love and a heart for nature, we create stylish glassware pieces in different colors that can be effortlessly mixed & matched, according to the interior or... the mood.

Our mission

Every drop counts

When I lived in Australia a few years ago, I was first confronted with the scarcity, and therefore the preciousness, of water. The host family where I stayed was very conscious and sparing with it.

Every drop counts.

It is a philosophy that I still hold dear to this day and which also forms the base of Paveau.

Because we want to help build a world where everyone has free access to clean water, Paveau, as a donating Member of the Spring, is committed to the organization Charity: Water.

Less waste

With Paveau we give conscious consumption – with less plastic waste – a boost. Because every year no less than eight million tons of non-degradable plastic waste disappears into our oceans. The consequences for our planet are dramatic.

By using your Paveau pieces, you reduce the mountain of waste and contribute to a more sustainable and beautiful planet.

Our bottles

Content: 1.25 l

Size: 28 cm x 10.5 cm

Weight: 500 gr

The glass design bottle from Paveau:

- ✓ is light in weight

Care

For a *sparkling* glass

Combining modern convenience with meticulous care, our Paveau glasses are designed for dishwasher cleaning. The gentle water flow erases traces of the past, leaving them not only hygienic but also preserving intricate features. Please choose a program of max. 50 °C.

For those valuing a personal touch, embrace the ritual of hand-washing. Use mild, non-abrasive detergents to cleanse your Paveau glasses tenderly, letting water restore their original beauty.

For a *clean and fresh* bottle

1. Before using, rinse thoroughly with (luke)warm water. Soap is not advisable, as it might be difficult to remove afterwards.

2. Want to quickly and easily rinse your beautiful Paveau bottle? It's effortless with a bottle brush.

Please avoid the dishwasher.

3. To clean and remove calcification on the inside of your bottle, we advise you to mix white vinegar and water in your bottle, shake it well and leave it for 10 minutes.

Rinse out with warm water.

Paveau tip: Repeat the cleaning process at least once a month to keep your bottle fresh and clean.

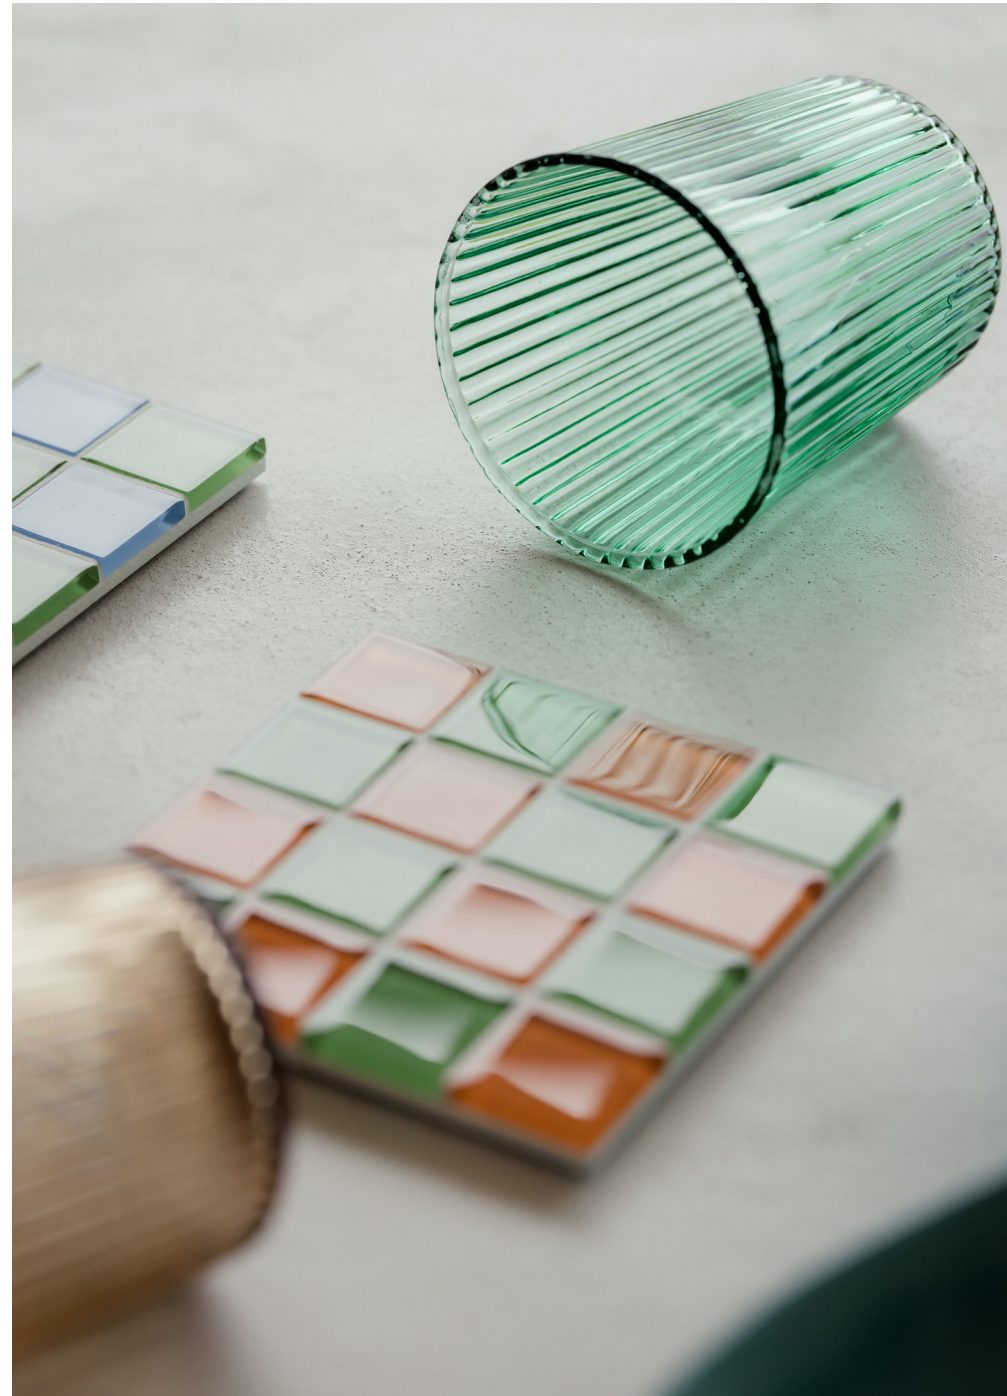

For *lifelong* Paveau pleasure

1. Fill your bottle with tap or slightly carbonated water. If you use highly sparkling water, remove the lid for a few minutes to release some pressure before you close your Paveau bottle.

2. While you can fill your bottle with any water you like, your Paveau bottle prefers filtered tap water. As well as being a perfect match for your Paveau bottle, it's also another way to support a more sustainable way of life.

3. Only fill up to this level.
